

Servicing Federal Needs with Best-in-Class Expertise & Solutions

Government Overview

What We Do

Advocating for Simpler Data Centers for over 15 years

Many agencies handle massive volumes of highly sensitive data from disparate sources that is overwhelming their capacity to efficiently collect, store, process and leverage with exacting levels of security and protection. They are heavily reliant upon aging systems and see their IT budgets increasingly consumed by rising operations and maintenance. Moreover, many budgets are being shifted to a cloud narrative which places emphasis on how to spend yet leaves much to be desired on how to optimize, operate, manage and support.

CTG Federal is a small business that excels in servicing dozens of federal defense, intelligence, and civilian organizations with IT expertise and solutions. We are specialists in designing and implementing next generation IT solutions that help save time and money for our customers. Our areas of practice include data center, hybrid cloud, networking and cyber security solutions and services. Headquartered in the greater Washington DC area, CTG Federal has satellite offices in throughout the United States.

Our Approach

We gain a full understanding of an agency client's needs and challenges. We then assemble and architect a solution that makes sense for that client's specific mission, IT objectives, and budget needs.

We deliver the gold standard with best-in-class solutions, sales, and customer support. We believe that a business thrives when built upon a growing a past performance record that is without parallel.

We operate in the present while thriving on the future. We work and architect solutions with dozens of mainstream OEM's, while carefully evaluating rising technology providers in both Silicon Valley as well as those birthed out of Federal integrators and high security enclaves.
